SUMMARY

Aspiring **AI/ML Engineer** with hands-on experience in building machine learning models and intelligent applications. Proficient in **Python**, deep learning frameworks, and **NLP**, with a strong ability to design end-to-end solutions. Seeking entry-level opportunities to leverage my skills in the field of **Artificial Intelligence and Machine Learning**.

SKILLS

Programming Languages: Python, Java, C++, SQL
Machine Learning AI: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation
Deep Learning Computer Vision: CNN, Transfer Learning, Image Classification, Action Recognition
Natural Language Processing Generative AI: Sentiment Analysis, LSTM, Text Preprocessing, Prompt Engineering
Frameworks Libraries: TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV, Pandas, NumPy
Tools Platforms: PyQt6, Flask, REST APIs, Git, GitHub, Streamlit, Google Colab
Soft Skills: Problem Solving, Analytical Thinking, Self-Motivated Learning, Time Management

PROJECTS

Smart File Organizer Pro [Link](#) Sep 2025 - Dec 2025

Technologies: Python, PyQt6

- Developed a production-ready **Windows desktop application** to automatically organize files using **rule-based automation** and **AI-assisted classification**.
- Implemented **background tray execution**, **duplicate file detection**, and **configurable user-defined rules**.
- Designed a **scalable modular architecture** using **Python** and **PyQt6**, improving **file management efficiency**.

AI-Powered Resume Evaluation & ATS Scoring System [Link](#) Feb 2025 - May 2025

- Developed an **NLP-based resume parsing and evaluation system** to generate ATS compatibility scores.
- Executed **skill extraction**, **keyword matching**, and **job-resume similarity scoring algorithms**.
- Created **section-wise scoring** and **skill gap analysis** to enhance resume-job alignment.

AI Data Analyst - Intelligent Data Analysis Platform [Link](#) May 2024 - Aug 2024

Technologies: LSTM, Streamlit

- Developed **AI-powered analytics tool** utilizing **natural language queries** through local **LLM inference**.
- Executed **statistical analyses** including **outliers**, **correlations**, and **missing values** with **interactive visualizations**.

LinkedIn Learning

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning 2022 - 2026

NIMS University, Jaipur, Rajasthan

INTERESTS

- AI Automation Systems
- Desktop Application Development
- Computer Vision
